What Can I Do With My Macintosh?

Software Demos – Week 6 *Easy Web Page Creation*

How To Get the Software

- Visit the developer's website
- www.VersionTracker.com
- www.MacUpdate.com
- www.MacCentral.com
- www.MacZot.com

OUR FEATURE PRODUCT: iWeb

iWeb is part of Apple's iLife Suite which comes bundled with every new Macintosh. The current version is iLife 08. While you don't have to subscribe to .Mac ... it makes things much easier if you want to publish your own website!

Other Apple programs, such as iPhoto, GarageBand, and iMovie allow you to integrate with iWeb so that you can publish multimedia projects to your website for easy sharing with family and friends!

RapidWeaver

RealMac Software
Free Trial Version

\$49
Min OSX 10.4 (older versions available)

Are you interested in purchasing a domain name and a web hosting service?

I recommend (and use) GoDaddy.com
